PERSONAL PROFILE

Hello! I'm Magaiver Magalhães, a Full Stack Developer passionate about creating outstanding web experiences. With over 3 years of professional experience, I develop complete applications – from Frontend to Backend – always focusing on performance, scalability, and high-impact design.

I hold a degree in Systems Analysis and Development, currently awaiting diploma issuance, and continuously enhance my skills to stay aligned with the ever-evolving technology landscape.

My main focus is on the Frontend, where I specialize in JavaScript and TypeScript, working extensively with React, Next.js, and Node.js. On the Backend, I master technologies such as PostgreSQL, MongoDB, Prisma, Drizzle ORM, and Firebase, building solid database structures, schemas, and relational models that ensure efficiency and reliability.

I'm also passionate about responsive design and intuitive user interfaces, leveraging Tailwind CSS and Styled Components to deliver modern, consistent visual experiences.

Throughout my journey, I have participated in challenging, multidisciplinary projects, applying creativity and software-engineering best practices to solve complex problems and deliver real value to users.

On my [GitHub](#), you'll find projects that reflect my passion for technology and commitment to excellence. I'm always open to new opportunities and collaborations that push my limits and help me grow as a professional.

Technologies I've worked with:

HTML • CSS • JavaScript • TypeScript • React • Next.js • Node.js • Tailwind CSS • Styled Components • React Router • Prisma • Drizzle ORM • Firebase • Git • Jest • MongoDB (NoSQL) • PostgreSQL (SQL) • Database Design • Data Modeling

Fortaleza, Ceará, Brasil

SKILLS

- HTML
- CSS
- JavaScript
- React
- Bootstrap
- JQuery
- php
- TypeScript
- Next
- SQL(PostgreSQL)
- NoSQL (Mongodb)
- Styled components
- React Router
- Docker
- Solid

CAREER OBJECTIVE

- Full Stack Developer (Mid-Level)

EDUCATION AND LANGUAGES

- **Higher Education:** Studying Systems Analysis and Development (UNIVERSIDADE ESTÁCIO DE SÁ)
- **Advanced English:** (Self-study/Living in Europe)
- **HTML Course** (w3schools.com)
- **CSS Course** (w3schools.com)
- **JavaScript Course** (w3schools.com)
- **Professional Programmer Course** (DCS)
- **GitHub Course** (w3schools.com)
- **MySQL Course** (w3schools.com)
- **TypeScript Course** (w3schools.com)
- **Bootstrap Course** (w3schools.com)
- **jQuery Course** (w3schools.com)
- **Advanced Google Analytics** (Google Course)
- **Next.js Course** (Full-stack Club)
- **React Course** (Full-stack Club)
- **SOLID Principles Training** (Full-stack Club)

PROFESSIONAL EXPERIENCE

PROJECT

Personal-web

<https://personal-chi-cyan.vercel.app/>

Web Development: Full Stack – Platform for Personal Trainers

Project Description:

Development of a complete web application focused on scheduling sessions with health professionals, especially Personal Trainers. The system allows professionals to register, display detailed profiles (including pricing, availability, and contact information), and enables users to book personalized sessions with ease.

I participated in all stages of development, from database architecture and modeling to the implementation of a responsive frontend, ensuring a smooth and intuitive experience for both users and professionals.

Technologies Used:

JavaScript and TypeScript: combined usage to ensure static typing, better maintainability, and code safety.

React: creation of dynamic and reactive interfaces focused on delivering the best user experience.

Next.js: leveraged for Server-Side Rendering (SSR) and Static Site Generation (SSG) to enhance performance and SEO.

Tailwind CSS: development of a modern and elegant interface with a consistent responsive design.

Shadcn/UI: use of modern and accessible components to build a cohesive and elegant interface.

NextAuth: implementation of secure and seamless authentication, ensuring user data protection.

PostgreSQL: robust relational database for efficient data storage and management.

Key Contributions:

- Structured the data model and database schema in PostgreSQL.
- Implemented authentication and authorization flows using NextAuth.
- Developed reusable components and a responsive layout with Tailwind CSS.
- Ensured high performance and scalability using Next.js and modern Full Stack development practices.

PROJECT

Tech-food

<https://mmtech-foods.vercel.app/>

Web Development: Full Stack – Food Ordering and Delivery Platform (iFood-style)

Project Description:

Development of a complete web application inspired by the iFood model, allowing users to browse restaurants, view menus, add dishes to the cart, place orders, and track delivery status in real time. The system was designed with a strong focus on performance, scalability, and user experience, ensuring smooth and intuitive navigation.

Technologies Used:

TypeScript and React: used to build a secure, modular application with reusable components.

Next.js: leveraged for Server-Side Rendering (SSR) and seamless integration between frontend and backend.

Shadcn/UI and Tailwind CSS: employed to create a modern, intuitive, and fully responsive interface.

Prisma ORM and PostgreSQL: responsible for the modeling and efficient management of the relational database.

Key Contributions:

- Structured the data model and database architecture using Prisma and PostgreSQL.
- Developed the responsive frontend with Shadcn/UI and Tailwind CSS.
- Implemented the order and cart flow, ensuring real-time updates and a smooth user experience.
- Applied best practices in typing and architecture with TypeScript and Next.js to ensure scalability and maintainability.
